Objective:

Frontend Developer with hands-on experience in **React, Vue, and modern JavaScript frameworks**. Completed internships at Web Masters and Arab Apps where I worked with **React, Next.js, Vue 3, and Nuxt** to build responsive web applications. Currently training in **Full Stack Web Development using Python** at Information Technology Institute (ITI). Seeking an entry-level role where I can build high-performance web applications and grow as a full-stack developer.

Professional Experience:

Front-End Development Intern, Arab Apps (Mar 2025 – June 2025)

- Contributed to real-world front-end projects using **Vue 3**, **Nuxt**, and **TypeScript**, along with **React** and **Next.js** in a team-based environment.
- Translated UI designs from **Figma** into responsive, accessible components.
- Integrated **REST APIs**, managed application state, and collaborated using **Git and GitHub** workflows.

Front-End internship, Web Masters (Sep 2024 – Dec 2024)

- Developed problem solving skills using JavaScript.
- Worked on practical projects using frontend technologies.
- Improved the codebase by enhancing readability, maintainability, and optimizing performance.

Professional Training:

Full-Stack Web & Generative AI Development Trainee (Jan 2025 – Present)

Information Technology Institute (ITI) – Intensive Code Camp

- Participating in an intensive full-stack development program (~594 training hours).
- Building responsive web interfaces using **HTML5, CSS3, JavaScript, Bootstrap**, **JQuery.**
- Learning frontend frameworks such as **React** or **Angular**.
- Developing backend applications using **Python** frameworks like **Django** and **Flask**.
- Working with relational databases such as **PostgreSQL**.
- Using **Linux, Git, Bash scripting, and Docker basics** in the development workflow.

Technical skills:

Languages: HTML, CSS, JavaScript, TypeScript, Sass.

Frameworks/Libraries: React JS, Vue 3, Next.js, Nuxt, Redux Toolkit, Pinia, Vuex, i18n, jQuery, Bootstrap, Tailwind CSS, Material UI, Vuetify, PrimeReact, Framer Motion.

Tools: Git, GitHub, NPM, Figma.

Education:

BCs, Faculty of Al-Alsun, Kafr Al-Sheik University. (September 2018 –May 2022)

Department: Spanish language and English as a second language.

Grade: Very good with honors.

Projects:

Admin Dashboard Web App-Team Project (Internship-Based)

Technologies: Next.js, TypeScript, PrimeReact, Redux toolkit

- Built reusable UI components using PrimeReact (e.g., tables, inputs, charts)
- Integrated internationalization support for multi-language translation
- Collaborated on initial API integration

Trio-SND (Shipping services platform) - [Demo Link]

Developed a responsive web platform that connects users with delivery service providers. Implemented multi-step forms, order tracking, and API integration using Axios.

Built with Nuxt 3 for SSR and improved performance, Tailwind and Vuetify for UI, Pinia for state management, veevalidate and yup for hundling forms and i18n for internationalization.

Weather application - [Demo Link]

Built a weather application using React js, Redux toolkit, Material ui and Weather API to fetch and display real-time weather data, with responsive design and geolocation features.

Fresh-Cart E-Commerce - [Demo Link]

Developed a dynamic e-commerce application using React, Context API and TailwindCss, implementing features like product searching, shopping cart functionality, and user authentication

To-do-list App - [Demo Link]

Developed a to-do list application allowing users to add, update, delete, search and mark tasks as completed using HTML, CSS, JavaScript, Bootstrap. Implemented task management functionality and utilized local storage for data persistence.
